

YOUR
JOURNEY
TO A BETTER
FLEET STARTS

MODERN SCALABLE

Why Formbird FLEET?

Formbird FLEET is a modern, comprehensive fleet information management solution that keeps all your fleet information in one place. With a user-friendly interface and powerful features, you can easily track your vehicles, equipment, and assets, monitor driver behaviour, manage maintenance schedules, and more.

Formbird manages over 4 million assets, ranging from sophisticated, multi-component garbage trucks to more straightforward equipment like chainsaws.

Australian Developed and Supported

Formbird FLEET is proudly developed and supported in Australia. Our deep understanding of the unique challenges and requirements of the local market closely aligns with Australian regulations, industry standards, classification, and terminology recommended by IPWEA FLEET.

Our Australian support team offers customers timely and efficient assistance with queries or issues. Ensuring smooth communication without language or time zone barriers.

We host your data on Australian-based servers.

Your data belongs to you.

COMMUNITY SUPPORT

Fleet Professionals Community

The **Formbird FLEET** Professional Community gather on Zoom every second month to discuss their experiences using the software.

Group members are maximising their **Formbird FLEET** experience by engaging with peers across the county. Members benefit from collective wisdom, sharing insights, tips, and best practices, ensuring they stay ahead with the latest features and updates.

Stay informed about the latest updates and best practices within **Formbird FLEET**.

Input from members helps steer our software's evolution, while connections forged in the group lead to innovative collaborations.

The **Formbird FLEET** Professional Community is committed to supporting its users, helping them maximise their software investment, and fostering camaraderie among fleet management professionals.

Continual
Improvement

Built for Australian conditions

No Internet —
No Worries

Offline Capability and Remote Locations:

Formbird FLEET's offline capability allows users to perform critical functions, such as digital pre-starts, even in remote locations without internet access. This feature is essential for organisations that operate in areas with limited connectivity, as it ensures that crucial workflow processes are not interrupted and continue to run smoothly.

Digital Pre-start Vehicle Safety Checks:

Pre-start streamlines vehicle safety checks.

Formbird FLEET enhances chain of responsibility (COR) compliance by recording real-time monitoring and reporting of fleet operations, ensuring compliance with safety regulations and reducing potential hazards. Its proactive approach to asset maintenance and driver performance tracking significantly mitigates operational risks and promotes a safer working environment.

Formbird FLEET enables the automatic creation of work requests when issues arise.

Put an end to paper-dependent procedures

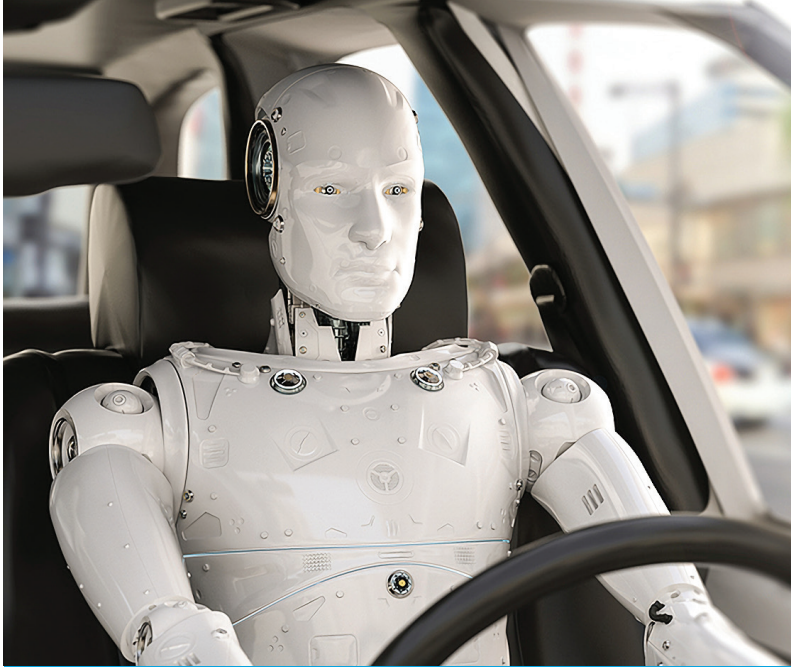

Formbird FLEET is designed to adapt, catering to organisations of all sizes, seamlessly accommodating business processes from the smallest enterprises to the largest corporations.

A Single application

Accessible on all devices —
smartphone, tablet, and desktop.

Safety-Integrated Telematics

Automated Alerts from telematics vehicle monitoring systems improve safety. Events such as harsh braking and excessive acceleration are logged, and rules-based notifications provide fleet managers with appropriate alerts and measures.

Streamline Vehicle Status with OBD2 and Automate Odometer/engine hrs recording

An OBD2 device enables precise data collection and real-time vehicle performance monitoring, ensuring better-informed maintenance decisions.

EV Ready Telematics and GPS

Location and Utilisation sorted

Telematics and GPS Integration:

Telematics and GPS technology are vital in enhancing fleet safety, precise location tracking and utilisation monitoring. Fleet managers can now oversee their vehicles in real time.

Telematics automatically generate service schedules based on the vehicle's odometer readings (via CAN bus), and OBD warnings helping to maintain vehicles in optimal condition and reducing the risk of downtime and voided warranties.

Remote Diagnostics and Driver Safety:

Telematics vehicle monitoring enables timely maintenance through insights into vehicle performance, while multi-device compatibility and EV readiness ensure technological relevance. Telematics can also let you establish geo-fencing alerts, and ensures drivers stay within designated boundaries.

Fuel Tax Credit Claims:

Formbird FLEET records time and location data for Fuel Tax Credit (FTC) claims, ensuring accurate reporting and potential cost savings for the organisation.

Adopting telematics vehicle monitoring significantly enhances vehicle safety, driver behaviour, and fleet management efficiency.

Empower your Operations

Asset Register

Replacement Reporting

Information to Communications

Efficient, Comprehensive,
Streamlined,
Future-Ready Fleet
Management

Formbird FLEET offers a total asset register, meticulously logging each vehicle's details:

- **Maintenance history**
- **Photos**
- **Driver certifications**
- **Warranties**
- **Records of smaller assets**
- **Risk assessment**

This extensive record-keeping provides a one-stop solution for efficient fleet management and quick decision-making.

Formbird FLEET streamlines all fleet management processes, from handling hires and coordinating asset maintenance schedules to automating work orders. Its integrated approach covers accident and fuel management, allowing you to focus more on strategic decision-making and continual improvement.

Formbird FLEET is future-ready, fully compatible with electric vehicles and proactive risk assessments.

Its long-term (10-year) and risk-based fleet replacement reporting provide data-driven insights for strategic decision-making, ensuring your fleet's optimal performance and cost-effectiveness.

Reports Ready to Go

- 72 in total including
- Asset Operating Cost Summary
- Asset Replacement
- Fuel Consumption and Utilisation
- Daily Drivers Completed / Not Completed today

Simplify Your Fleet Insights

Your complete fleet data in one place

Enhanced Reporting and Custom Dashboards

Formbird FLEET enhances fleet management with advanced, tailored reporting and custom dashboards, catering to different roles like asset managers and mechanics. It provides 68 ready-to-use reports and extensive data handling options, including seamless export to Excel. This feature ensures that essential information is easily accessible and manageable, promoting efficient decision-making.

Streamlined KPI Monitoring

Formbird FLEET emphasises streamlined monitoring of Key Performance Indicators (KPIs), crucial for optimising fleet operations. It enables detailed metrics tracking like preventative maintenance compliance, downtime, repair times, and work order efficiency. These insights, generated through industry-standard terminologies and financial reports, aid in achieving superior operational performance.

Holistic Asset Management

The platform's comprehensive asset register offers total visibility of your fleet, including detailed profiles for each vehicle — akin to a “Facebook” page. It tracks everything from primary vehicles to small tools, integrating service, warranty details, and driver records. This all-encompassing approach ensures thorough control and continuous adaptation to evolving fleet needs.

MODERN FLEET MANAGEMENT

“

Accurate asset records from Formbird FLEET have streamlined our inventory management, leading to improved asset utilisation and cost savings.

“

Since implementing Formbird FLEET, we've seen a marked improvement in safety, with fewer incidents and a more robust safety culture among our drivers.

“

Reports generated by Formbird FLEET provide us with invaluable data, helping us make informed decisions about our fleet management.

“

Formbird FLEET's telematics feature has revolutionised our fleet monitoring, offering real-time insights that significantly enhance operational efficiency.

“

The maintenance scheduling with Formbird FLEET is a game-changer, ensuring our vehicles are always in top condition. And complying with manufacturer's warranty.
